

Design & Access Statement

Co-op Funeralcare, 7 High St, Haverhill CB9 8AA

This application is for new external signage for the Co-op Funeralcare to represent their new branding.

The site is located in the town centre opposite St Mary's Church on Market Hill.

The new scheme is proposing a new fascia sign and projector. Both with external illumination by trough lights. Full details are provided in the signage pack attached to the planning application.

The new signage will replace the existing signs in the new branding colour grey and cream. The signage has been kept simple and with low illumination to be sympathetic to the building and its traditional surroundings.

Proposed signage

The site is located close to many business's and residential properties and the Co-op want to make sure that the building is kept in a good condition and remains appealing to the local area and its surroundings.

The installation will be done in a day, keeping disruption to the area to a minimum and only working during sociable trading hours.

The illuminations will only be on during the open hours of 9am to 5pm.

The proposal is to run in line with other works that are planned at the site to keep the branch being a valued part of the community.
