Subject: 2,500 home development north east Haverhill

Dear Planners St Edmundsbury Borough Council

(Chris Rand)

Asked to have our say as a resident of Haverhill living on the Chalkstone estate ,I am opposed to this development going ahead it is beyond belief that not only this huge amount of new housing 2,500 a potential of 5,000 to 10,000 increase in population of Haverhill Suffolk but also there is another development of 1,500 in the pipeline of family housing ,which could then bring a maximum 8,000 to16,000 .

This can not be allowed to happen.

Haverhill is struggling at present with the lack of employment ,crowded schools lack of healthcare transport etc etc.

We are the poor relations to Bury St Edmunds where they have all the facilities Hospital ,sports businesses buzzing town centre, entertainment schools college, Our Infrastructure will not support building new homes and increasing our population by a third without these things already in place and would drain the lifes blood out of this Town.as for saying its for locals .where are all these so called local people ?.As for where we live on the chalkstone estate we already have a huge increase in heavy traffic vehicles that disturb our sleep imagine if every new home had 2 vehicles thats 5,000 extra cutting down these roads already can't cope and potholed.Then there is the fact a undefined health centre even if it was a doctors surgery, would stretch our servies that are failing to cope with the influx of new families into Haverhill and I who have serious health problems find I can't get appointment or suffer the long bumpy crowd bus journey to our nearest Hospital over an hour by bus.

Yours sincerely Mrs & Mr D Abbott
