With regards to this development my points are as below:

- The traffic currently at rush hour times is significant already along chalkstone way especially at school times
- Parking is an issue whereby school car parks are not being utilised and parents are using residents private spaces/garages as it is
- Noise will be hugely increased especially for those whose gardens back onto this road (mine included). The lack of noise and open fields were a buying factor when we bought our house.
- 2500 units..each family will average 2 cars, that's potentially 5000 additional cars, causing noise and pollution and potential for accidents especially near to the proposed roundabout which is not far from a school.
- Speedbumps leading up to this new proposed round about (which are needed) will slow all the traffic down causing huge congestion
- Our town centre needs improvements prior to more houses being built. Haverhill is a small market town with no train station that is not able to support this level of change and strain.
- We are so lucky as a town that has access to these farmlands going right out to Kedington used for a variety of activities including dog walkers, families and the Haverhill running club. I'm all up for improving and moving forward with the times but we need to improve what we have prior to taking our lack of green space away a beautiful view we have from our houses.

Kind regards

Fiona Morgan
