The amended plans for new roundabout, and other junctions, do not cause me any major concerns however I do want to register my objection regarding the location of the proposed bus stop to the north west of the new roundabout on Chalkstone Way. I believe this is not a safe location for this considering the slope of the land and the potential for causing blind spots for drivers approaching the new enlarged roundabout.. In the absence of any new bus transport strategy this needs to be reconsidered, even though there is a stop there now, as very rarely used now due to the routing the buses take. Can this be added to the planning portal?

Thanks – John
