8cm flat sleeve with 2no. mastbands & 1no. eyelet.

Pantone References: CMYK as file

■ 200

Please email back to confirm this order

Please check this proof carefully, including any misspellings of names/ numbers/websites. Your approval confirms that we are able to proceed based on the information supplied on this proof, and confirms you have obtained all relevant permissions to use copyright materials used in the artwork, we will not be responsible for any errors in the composition/details of the product.

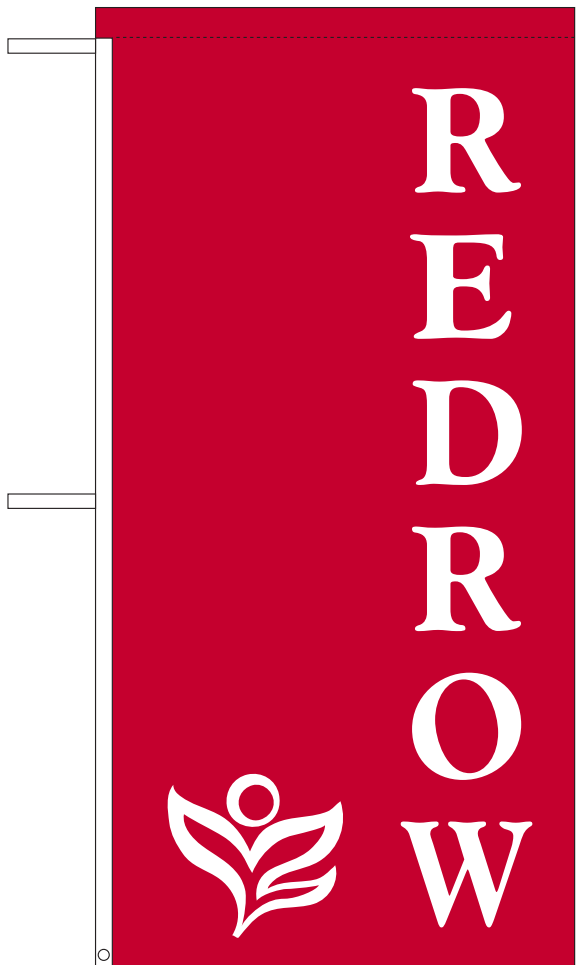

If artwork files are supplied in any rasterized format (JPEG, TIFF, PSD, PNG etc), we have no control over how the artwork will print. It is not possible to edit rasterized file formats at the designer's discretion.

Files are printed using a four colour CMYK process, every effort will be made to match Pantone® references if required, however please be aware some Pantones® do not have an exact CMYK equivalent. Colours can be altered by the substrate of the product during printing and may not match the density/brightness of the colour shown on this visual. If the colour is not questioned, we will not be responsible for the re-print/ reproduction should this be required.

Should you require a colour match to an existing flag, the flag should be supplied to us for a colour match. Requesting this will increase the production time while tests are made to best achieve a correct match.

If the flag is being hand sewn, we are able to supply a sample swatch of material for approval. Requesting a sample swatch will increase the production time for the requested product.
