Comments

This Service has previously reviewed the Geosphere Environmental Ltd, Phase 1 Desk Study and Phase 2 Site Investigation Report, reference 995,SI/SG,PD/09.12.14/V1, dated 9 December 2014. Although we had a number of minor comments in relation to the report, it is considered broadly acceptable in relation to Phase 1. Therefore we are satisfied that the land contamination condition (condition B25) of SE/09/1283/OUT may be discharged in relation to Phase 1 only.
