We would like to correspond our concerns and objections of the plans for the new Persimmon developments-Boyton Hall- Anne suckling Rd.

Firstly, why haven't Boyton Hall residents been informed of the revised plans?

We have now been shown the new proposal for Anne Suckling Rd to be basically used as a link road. This has been highlighted to us by neighbours to which we are grateful and hope we are now not too late to oppose this u-turn from persimmons.

We had been led to believe that a Bypass was to be built for new dwellings and for the future traffic flow of Haverhill. There had never been any plans to access Anne Suckling Road by any other estates /phases.

Anne Suckling Rd would definitely become another Haverhill "Rat Run "

There would be an increased amount of traffic using Anne suckling rd which always has parked cars near the junction. During school/work peak times this volume of traffic is a major concern. I believe the increased traffic would be devastating and something traffic calming measures would not address.

Over the last few months there have been several near accidents on Anne suckling Rd, some due to building work traffic. If Anne suckling Rd is to be used for the new phases I fear that this situation will only worsen.

We therefore strongly object to any plans that would ultimately link Anne Suckling Rd to other Haverhill estates.

Yours sincerely

Karen And Richard Telfer
