Suffolk County Council Reference: SCC/0045/23SE

RE: Construction and operation of an anaerobic digestion facility, associated infrastructure and new access road, connecting pipeline and covered digestate lagoons over two separate parcels of land at Land north of Spring Grove Farm

Dear Andy,

Further to the recent submission of the above planning application I write to clarify a matter relating to the planning application form, which was completed on the Planning Portal. As you are aware, the proposed development is considered a waste development, and identified as such to enable its submission to Suffolk County Council.

However, under the section 'Industrial or Commercial Processes and Machinery' the Planning Portal offers limited options which leads to some types of waste development not being listed. When completing that section of the form the waste streams listed only include the following:

- Municipal
- Construction, demolition and excavation
- Commercial and industrial; and
- Hazardous

The above waste streams do not apply to this application. This proposed development's waste stream will comprise Agricultural Wastes, which as seen is not an option for selection. We could not complete that section of the online application form.

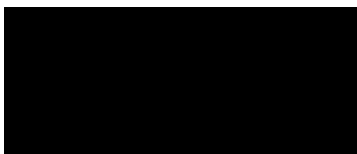

However, for the avoidance of doubt we can confirm the following, were the form have all available options:

- *Type of waste management type:* Anaerobic Digestion
- *Total capacity of the void in cubic metres:* 0 cubic metres
- *Maximum annual operational through-put in tonnes:* 92,000 tonnes (comprising Agricultural Wastes)

I trust this addresses your concerns, however if you have any further queries, please do not hesitate to contact me.

Regards,

SLR Consulting Limited

Rhian Thomas
