Dear Mr Rutter,

We are George (14 years old), Amelia (12 years old) and Arthur (8 years old) and we live really close to where this is going to be built. We are really worried about the horrible traffic, all the massive lorries and tractors that will be driving around causing pollution and scaring our pet cats who like to play in the fields. We are also really sad because we like walking with our mum onto the Roam Road from our house and we go on lots of adventures and picnics looking at the birds and spotting bugs and insects in the hedgerows (we like to take our bug pots with us and our identification cards to see what we can find). We won't be able to do that anymore if this is built and there aren't many places we can go to be outside. We try not to use our car so that we are doing our best for global warming but we will have to get in our car to drive somewhere to go on a nice walk which seems a bit mad to us!

We really hope you can help us,

Thanks so much.

George, Amelia and Arthur Ives
