Subject: Bio digester. Haverhill

Dear Sir / Madam,

I believe to build the Bio digester in close proximity to Haverhill is totally the wrong location. My husband and I live very close to where this is to be built. We both suffer with lung conditions. My husband having chronic COPD (breathing difficulties) and is on oxygen. I really don't understand why Haverhill has been chosen for this building when there are other sites in the country not in the vicinity of houses.

We are getting Haverhill back on track for a better place to live and now we have this monstrosity on the horizon.

Definitely WRONG location
