I would like to strongly object to the proposed application. I

The proposed site is in the parish of Withersfield, a conservation area.  
There will be increased light and noise pollution.

It is 600 metres from the EpiCentre, Haverhill's premier office centre, 600 metres from Sainsburys superstore and 600 metres from a major housing development. Hardly the ideal place for such a plant, especially given the recent explosion at the Trent Green Power facility.

There will be increased traffic on already over laden roads. The A1307 is a high casualty road, the rural roads around the villages are narrow with high grass verges and ditches with no footpaths. They are already a well-known rat run. They are not wide enough for two HGVs to pass without creating a jam.  
The proposed roundabout on silver street is nonsensical given the roads.

The site is known to be prone to flooding
