Good morning,

I would like to object to the planning application number listed above.

I believe the negative impact it would have upon the local population and environment would be more considerable than any potential benefits it would bring. I am resident in Withersfield with my young family, having moved here nearly three years ago.

If this application were to progress, we would try to leave the area. I am worried that the smell from the plant would mean we could no longer enjoy being outside and the increased traffic would make it a far less attractive place to live.

I understand the benefits of seeking alternative fuels, but I don't think this should be to the detriment of the people already living and working in the area. There must be alternative locations that would be more appropriate that wouldn't have the same negative impact.

Yours sincerely, Richard Warren
