Morning

I'd like to register our objection to where the biodigester is looking to be placed.

Close to family homes, school and a local river and fishing lake and local walk.

If that was to ever leak it will run into the river leading to river stour which is full of wild life and wild swimmers, do not only could it kill a lot of wild life it could make local swimmers very ill, and not to mention the smells on a breezy day.

I'm not against the thing coming to town but we are strongly appraised to where you are going to put it. Especially when there are a lot better places it could go out of eye sight and not the first thing you see coming into town and last thing you my smell heading out.
