**Subject:** Anaerobic digester Haverhill

I have previously putting an objection to this but am having problems trying to get onto the link to re object

There are many reasons for my objection and I would you to that I am still very much against it  
One of my reasons, and there are many , is that with all the Lorrie's going to and from the site be healthy for the environment

With all the fuel they will be using it will be adding pollution to the air and also creating a noise and smell problem for the dwellings nearby

I hope to be at the meeting to back this Muck off Acorn campaign

Regards

Lauren atkinson
